

Locale - Credits

Locale is a SaaS platform that enables Operations teams to monitor critical events and disruptions across their value chains in real-time. It is built for modern and fast-moving ops teams.

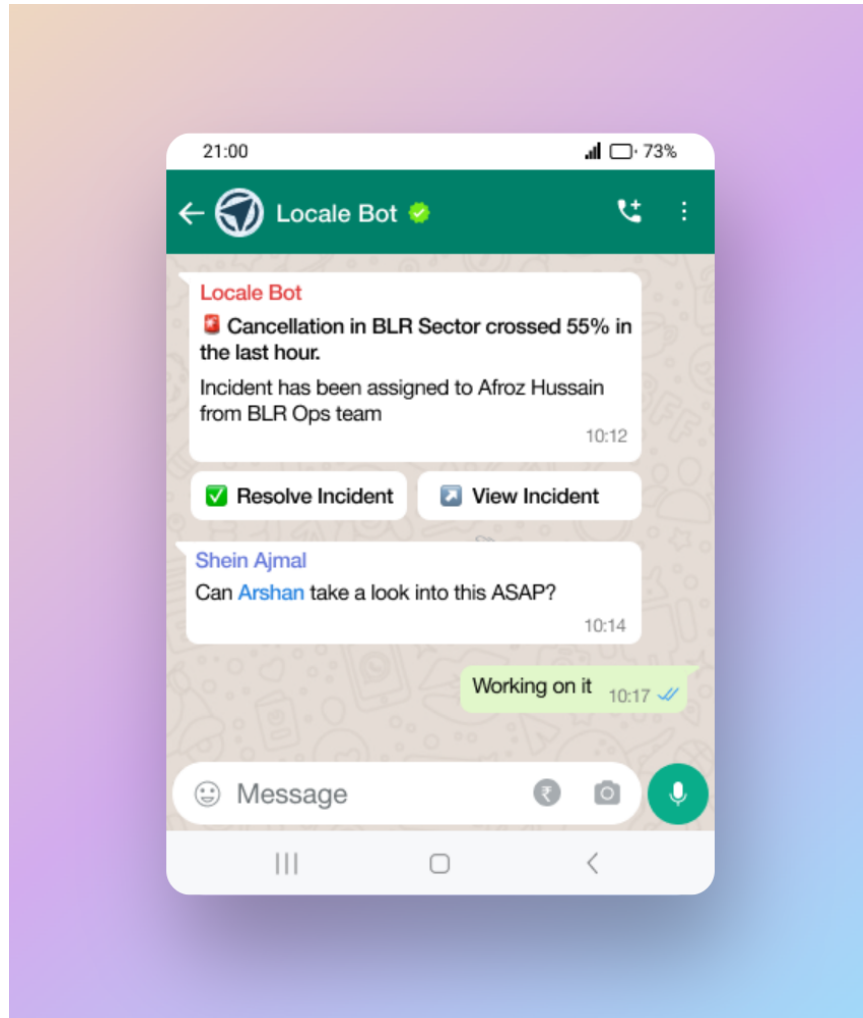

With dozens of prebuilt alerting templates in place, Locale integrates seamlessly with all leading databases/data warehouses in less than seven minutes.

A quick interactive demo of how our platform works can be accessed by [clicking here](#).

More details about the product:

- Locale hosts a suite of integrations that enable teams to connect their existing favorite apps so that existing teams do not have to undergo additional training and get notified and take actions from platforms they're already familiar with.
- In addition to our native incident management features, users can also directly perform the following actions directly from **e-mails, Slack, Microsoft Teams, Whatsapp, and more** — making adoption across traditional on-ground teams a lot simpler.

- ⚡ Getting notified about incidents via real-time alerts
- ⚡ Resolving incidents with a single click
- ⚡ Adding labels directly from the message threads
- ⚡ Adding comments to incidents on the go.

CREDITS

- **100% discount** on subscription charges for **up to 7 users** in the workspace for Better Capital portfolio companies.

HOW TO AVAIL CREDITS

Please apply via the following link and use the referral code mentioned below:
